

CENTER for MEDICAL INTEROPERABILITY

ACCELERATING THE SEAMLESS EXCHANGE OF INFORMATION TO IMPROVE HEALTHCARE FOR ALL

WHO WE ARE

The Center for Medical Interoperability is a 501(c)(3) cooperative research and development lab founded by health systems to simplify and advance data sharing among medical technologies and systems. We provide a centralized, vendor-neutral approach to performing technical work that enables person-centered care, tests and certifies devices and systems, and promotes the adoption of scalable solutions.

HOW WE'RE DRIVING CHANGE

Our Expertise

Our Technical Advisory Committee (TAC) oversees our efforts to reduce technical complexity and input from our Clinical Transformation Advisory Committee (CTAC) ensures that solutions are useful, safe and satisfying for patients and their care teams.

How Patients Win

By advancing data sharing among medical technologies and systems, we will enable **information to move freely and securely** from the point of care, like a hospital bed, doctor's office or home, to wherever it is needed to **best support clinical decision-making**, research and analytics.

Our Strategic Focus

Technical Portfolio

Protect against cyber threats through **Trusted Infrastructure and Medical Devices**

Connect **Everything** through industry-specified interfaces for devices and applications

Enable greater control over the data needed to care for individuals and populations through **Next Generation Platform Architecture**

OUR BOARD

Our board represents the diversity of healthcare and is unified by our desire to make healthcare more person-centered.
